Software Engineer

Software Engineer with hands-on experience designing and developing enterprise HR tools, backend services, and multi-tenant systems using Node.js, NestJS, and PostgreSQL. Skilled in RESTful APIs, RBAC, data ingestion pipelines, caching, and Linux-based containerized workflows. Proficient across Python, JavaScript, and modern AI-assisted development tools, with a strong foundation in database architecture and system modernization.

SKILLS

Soft Skills: Adaptability, Communication, Problem-Solving, Team Collaboration

Programming Languages: Java, JavaScript (ES6+), PHP, Python, TypeScript

Frameworks & Libraries: ExpressJs, FastApi, NestJS, NextJS, Node.js, React.js, React Native, Tailwind CSS

Databases: Firebase, MongoDB, MySQL, PostgreSQL

Tools & Platforms: AWS, Claude Code, Codex, Docker, Firebase, GitHub, Linux, Microsoft Azure

Concepts: Agile Development, Algorithms & Data Structures, Authentication, MVC Architecture, RBAC, RESTful APIs, Unit testing

EDUCATION

Bachelor of Science in Computer Science

DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY (DeKUT) • Nyeri, Central Kenya • 01/2022 - 02/2026

Relevant coursework: Software Engineering, Artificial Intelligence, Machine Learning, Algorithms & Data Structures, Web Development with JavaScript

High School Diploma

Meru School • Meru, Kenya • GPA: A- • 01/2018 - 04/2022

WORK EXPERIENCE

Gemba PMS • Westlands, Nairobi, Kenya • 03/2026 - Present

Junior Fullstack Developer • Full-time

• Designed and developed a full-stack Employee Management System using Next.js, NestJS and PostgreSQL, covering identity, work allocation, roles, contacts and skills.

• Implemented multi-tenancy using a shared PostgreSQL database, enforcing strict data isolation between client organizations without separate databases or schemas.

• Designed and implemented role-based access control for application permissions and organizational workflows.

• Built a multi-client data ingestion and import pipeline to support onboarding and processing of employee data.

• Engineered a real-time notification system and integrated TanStack Query for client-side caching and optimistic UI updates.

• Worked extensively in a Linux-based development environment, using command-line tooling and Docker as part of application development and deployment workflows.

EKShop • Nyeri, Kenya • 09/2025 - 03/2026

Fullstack Developer • Board

- Co-founded and led the development of a campus-focused e-commerce platform serving 500+ students and local residents, enabling affordable product discovery, ordering, and local delivery.
- Architected the modern full-stack architecture using Next.js, FastAPI, and PostgreSQL, implementing core e-commerce workflows.
- Designed AWS infrastructure using Terraform, establishing reproducible infrastructure-as-code for application and database deployment.
- Led user testing and feedback cycles with students and local customers to identify usability issues and validate features.

PROJECTS

EduTab • 10/2025 - 03/2026

- Built a cross-platform Learning Management System using Flutter and Dart for students, teachers, and administrators.
- Integrated Firebase Firestore, Authentication, and Cloud Storage for backend services and data management.
- Implemented role-based access control for Admin, Teacher, and Student workflows.
- Built real-time assignment, announcement, and grading updates using Firebase listeners.
- Designed a responsive UI for course management, assignments, and student progress tracking.

Agrotrack (Farm Management System) • 07/2025 - 01/2026

- Built a full-stack mobile application enabling farmers to manage farms, tasks, and crop data.
- Integrated LLaMA (via Groq) to power a real-time agricultural AI assistant.
- Implemented YOLOv8-based crop disease detection with image upload and inference pipeline.
- Architected scalable Node.js backend with RESTful APIs, JWT authentication, and Redis caching.
- Designed normalized PostgreSQL database schema for efficient agricultural data management.
